

QUALITY, HEALTH, SAFETY & ENVIRONMENT

Offshore-Tech is committed to delivering our services safely, responsibly and to a consistently high standard. Our Integrated Management System provides the framework for managing quality, health, safety and environmental performance across our operations. We are committed to:

- Providing safe and healthy working conditions
- Identifying hazards and reducing risks associated with our activities
- Protecting the environment and reducing our environmental impact
- Meeting applicable legal, regulatory and client requirements
- Setting and reviewing QHSE objectives and performance
- Continually improving our management system and the way we work

QUALITY

We aim to deliver reliable services that meet agreed requirements and consistently high standards. We achieve this by:

- Understanding the scope, requirements and objectives of each project
- Providing competent personnel, suitable equipment and appropriate resources
- Planning and executing our work in accordance with our Integrated Management System
- Seeking client feedback and addressing opportunities for improvement
- Applying lessons learned to continually improve our services and processes

HEALTH & SAFETY

The health and safety of our personnel and others affected by our activities is a priority in everything we do. We are committed to:

- Providing safe and healthy working conditions
- Identifying hazards, assessing risks and implementing appropriate controls
- Preventing work-related injury and ill health
- Providing competent personnel with appropriate training, equipment and support
- Consulting with personnel and encouraging participation in health and safety matters
- Learning from incidents, observations and experience to continually improve our performance

ENVIRONMENT

We are committed to protecting the environment and reducing the environmental impact of our activities. We aim to:

- Use energy, materials and other resources responsibly
- Reduce waste and promote reuse and recycling where practicable
- Minimise the use of hazardous substances and seek safer alternatives where possible
- Consider environmental impact when purchasing equipment, materials and services
- Plan transport and operations efficiently to reduce unnecessary resource use and emissions
- Continually improve our environmental performance
